

## Data Flow Diagram

|                      |               |
|----------------------|---------------|
| <b>Date</b>          | 27 June 2026  |
| <b>Team ID</b>       | xxxxxx        |
| <b>Project Name</b>  | Rising waters |
| <b>Maximum Marks</b> | 2 Marks       |

### Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

### DFD Symbol Legend

| Symbol                                   | Name                   | Description                                                                                                          |
|------------------------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Oval / Rounded shape</b>              | <b>External Entity</b> | A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway). |
| <b>Rectangle with numbered header</b>    | <b>Process</b>         | An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).                |
| <b>Rectangle (solid fill, no number)</b> | <b>Data Store</b>      | A place where data is held for later use (e.g., Customer Database, Inventory).                                       |

|                      |                  |                                                                                                            |
|----------------------|------------------|------------------------------------------------------------------------------------------------------------|
| <b>Labeled arrow</b> | <b>Data Flow</b> | The movement of data between entities, processes, and data stores, labeled with what data is being passed. |
|----------------------|------------------|------------------------------------------------------------------------------------------------------------|

### Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
